Our area of expertise

Software isn't cookie-cutter - it depends on what your needs, goals, and budget are. The same goes for the services we provide.

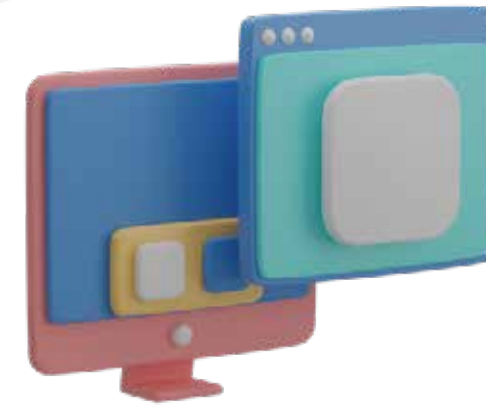

NOC Services

24x7 Support from state of the art NOC Services.

AR/VR/MR

With AR/VR & MR integration, we can provide better customer experiences and help take your business to new levels.

Enterprise software development

Reliable software capable of being scaled quickly. Modern architecture approaches allow us to build for today, tomorrow, and the future.

Mobile Development

Native Android, iOS, Cross platform, & Mac apps

Web Development

Responsive websites and PWAs built for speed

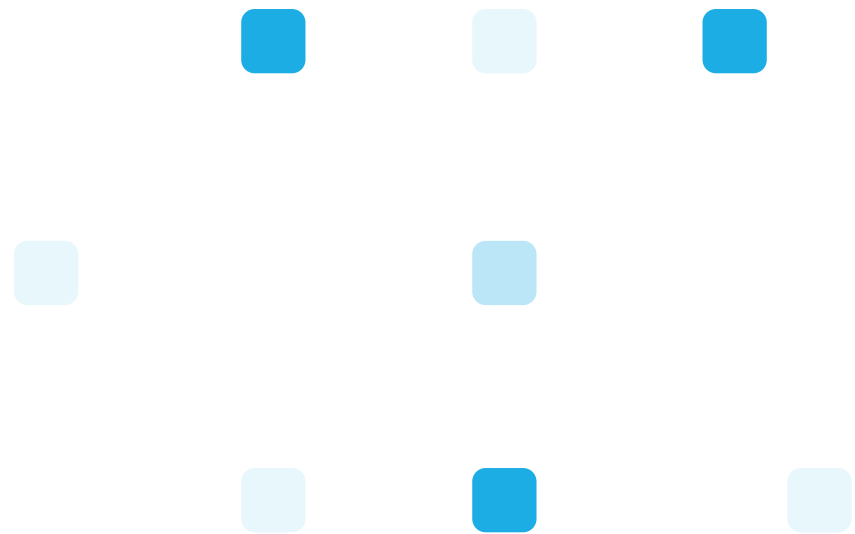

UI/UX Engineering

Fresh-looking designs and intuitive interfaces that communicate with your audience, clients and partners.

Healthcare

Leverage our more than two decades experience of developing digital solutions for Healthcare and Medicine

We have successfully delivered more than 100+ healthcare solutions for some of the major industry giants of the pharmaceutical Industries.

Dosage Scheduler Application

We created an easy to use dosage scheduler app focusing on pregnant women for one of our pharma giants.

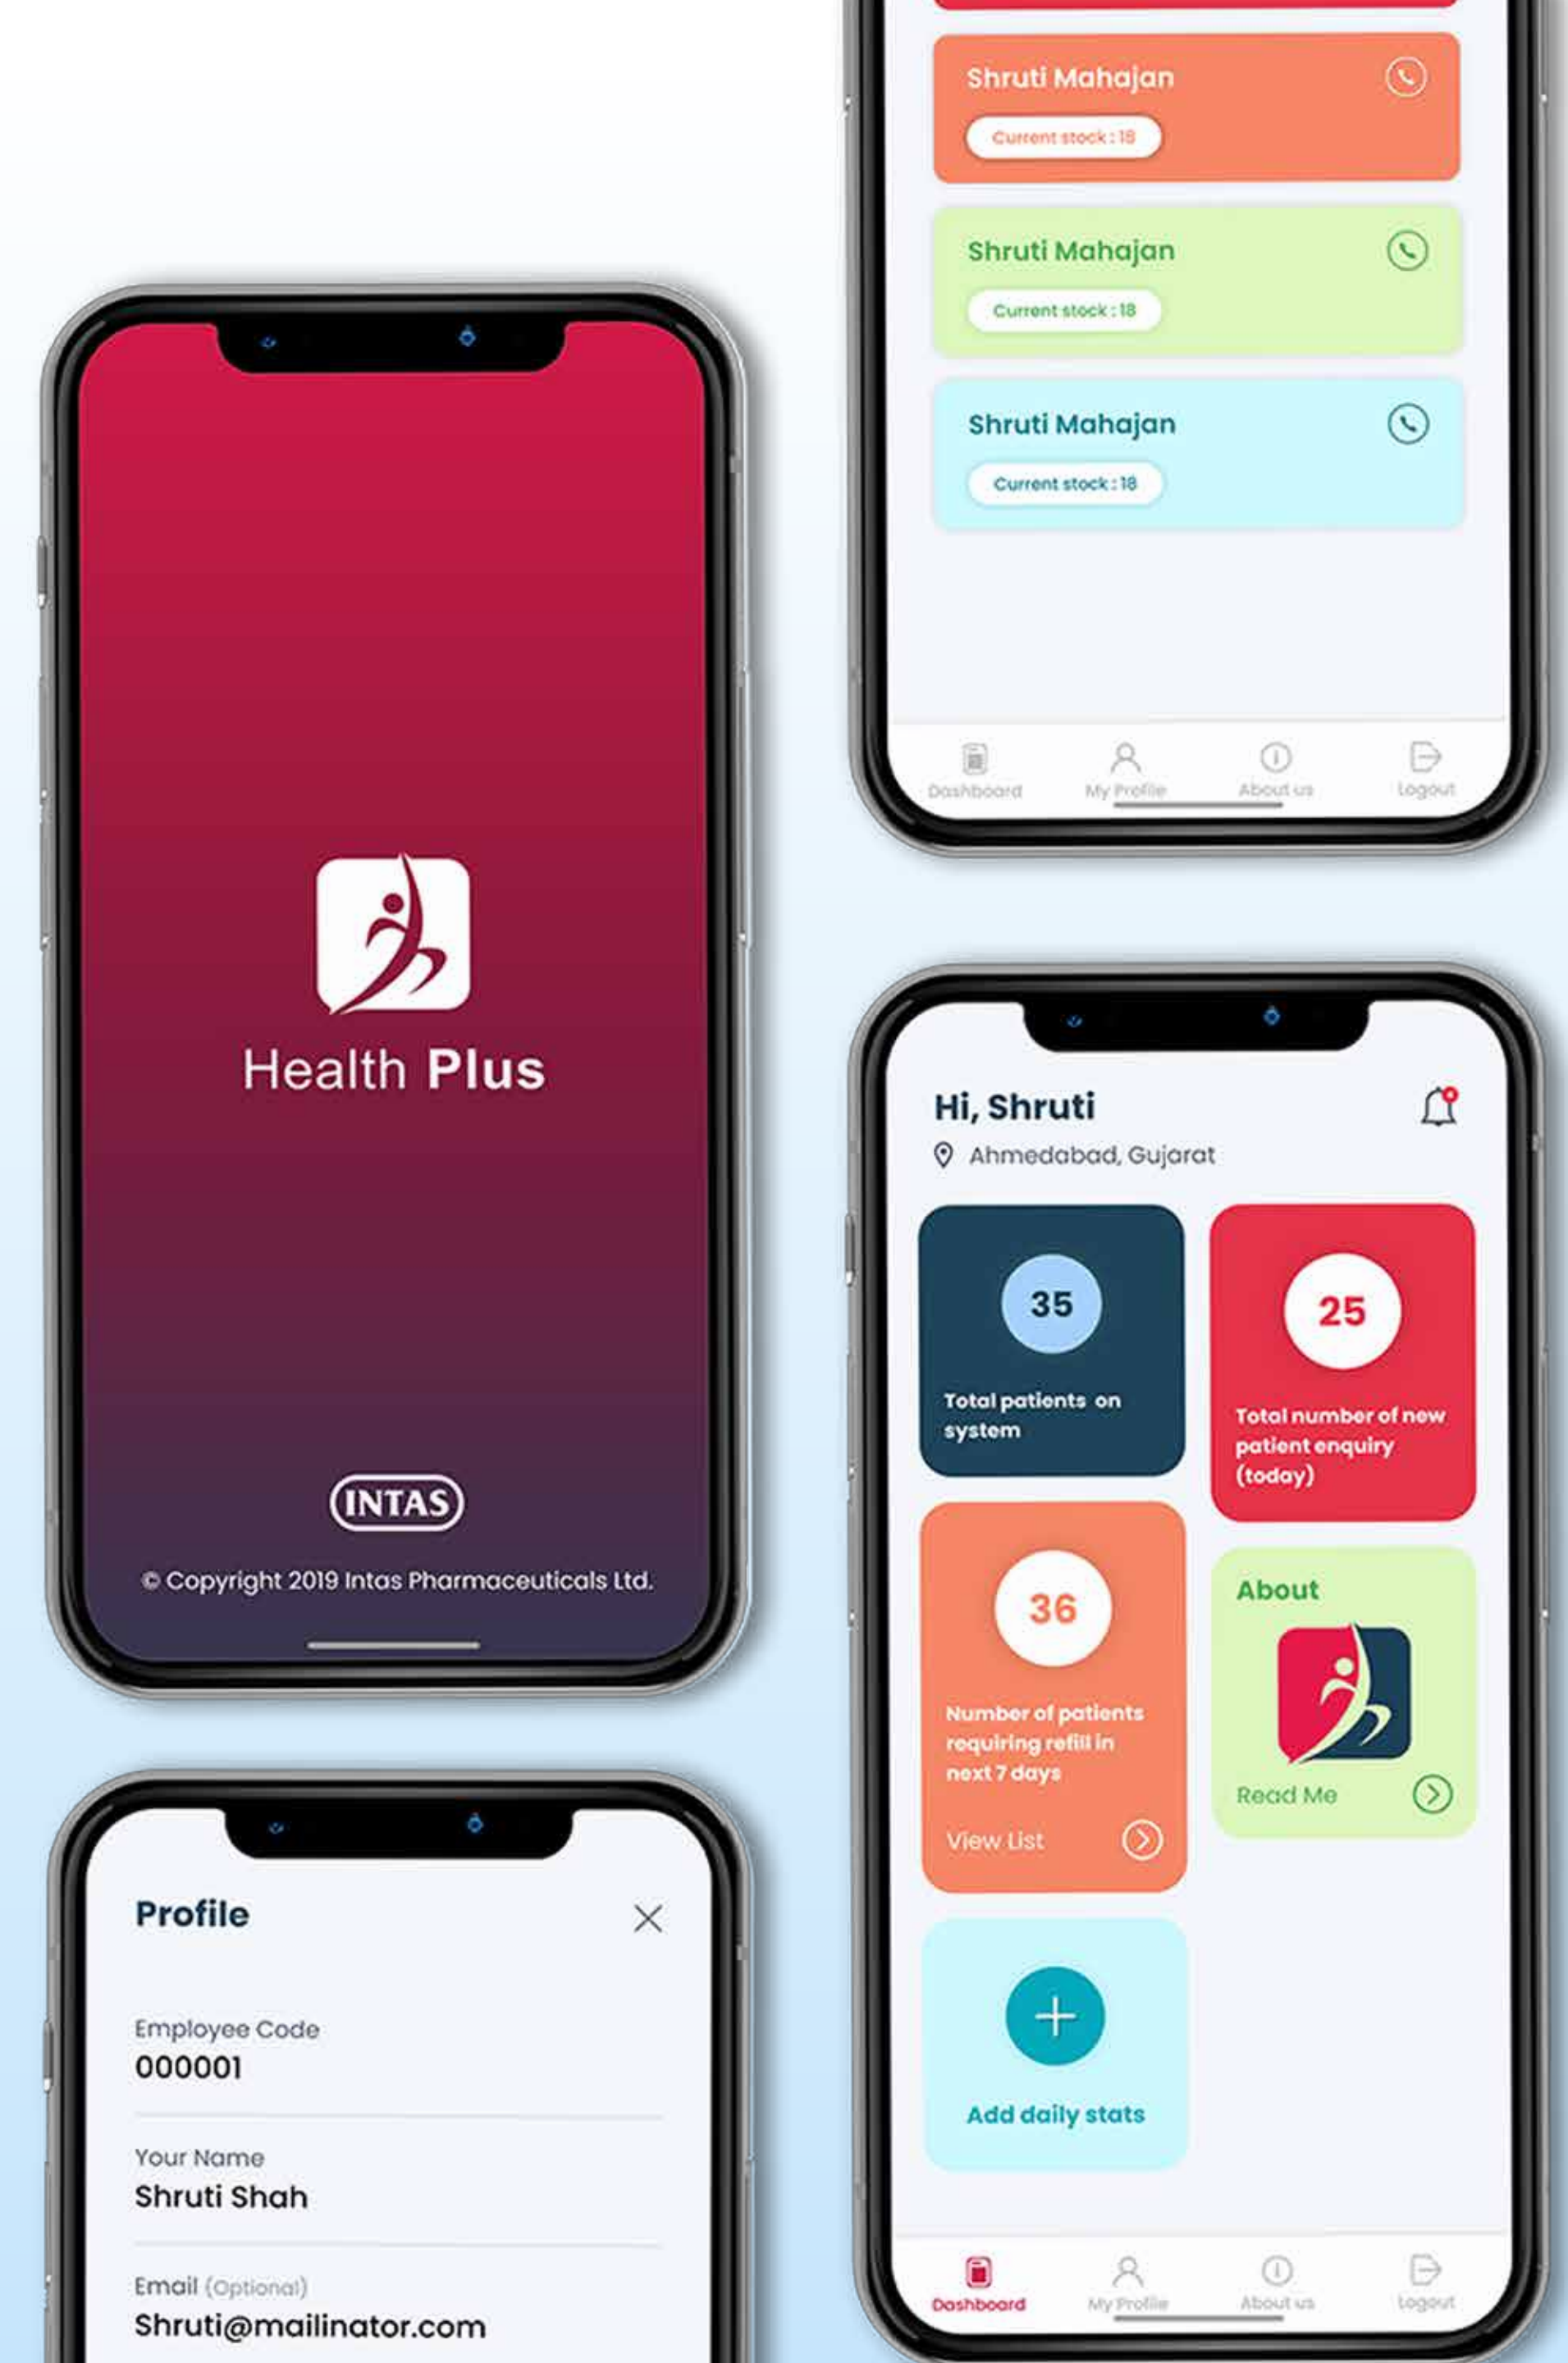

Problem Statement

Client was looking for an app that expecting mothers can use to track their medicine dosage, stock and can have easy restock using application.

Solution Provided

We created a user friendly mobile application which provided users with option to schedule their medicine dosage and setup the reminders for every day on what time the dosage should be taken and in what measurement. App also indicates the low stock based on everyday dosage tracker and notifies user as well as the nearby sales representative when its time to restock.

Platforms -  

Internal Ticketing System

A solution for corporate staff and sales person to track and monitor their requests related to different doctors.

Problem Statement

- ✓ Provide a mobile and web based system where sales person can raise a ticket for different tasks for doctors and corporate staff can provide the solution on each ticket in automated way.

Solution Provided

- ✓ We created a mobile & web based platform, that solved the problem of long approval cycle and delays which sales people encountered in manual process. The system is automated in a way that in case of delays, the ticket gets assigned to another superior and the resolutions are given in much shorter duration.

Platforms -  

Blood Pressure Monitoring Application

- ✓ The BP monitoring app provides patients with an easy app where they can enter their Blood pressure data on a daily basis and get helpful tips and inputs based on their stats.

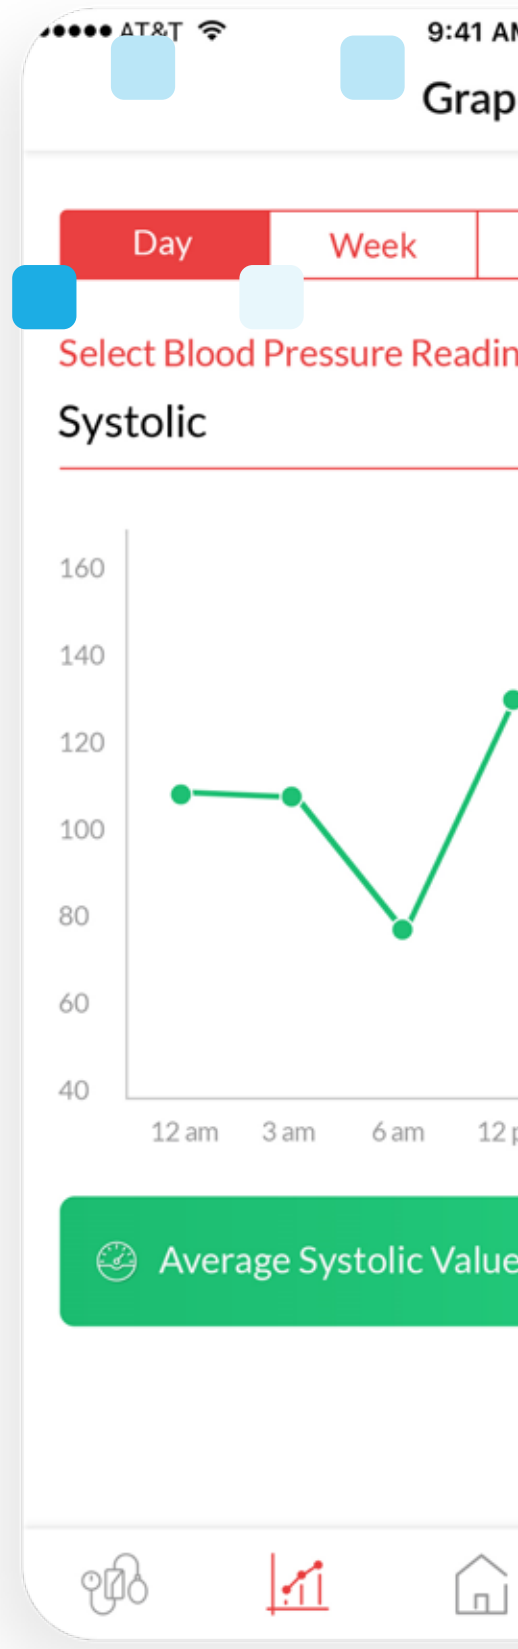

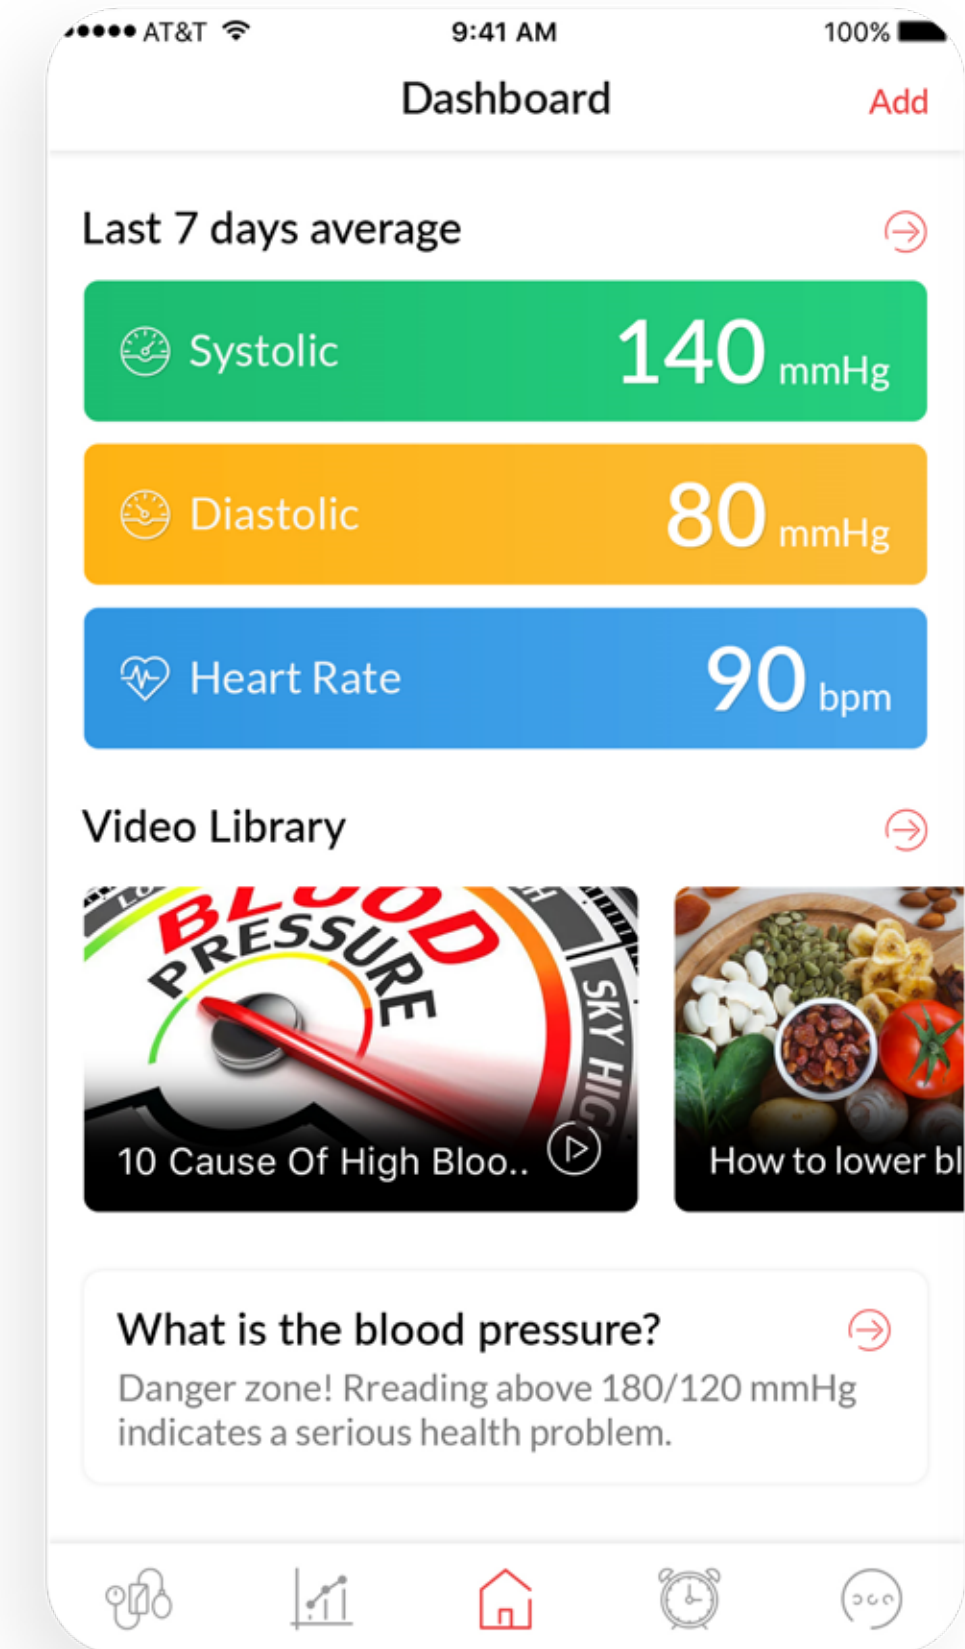

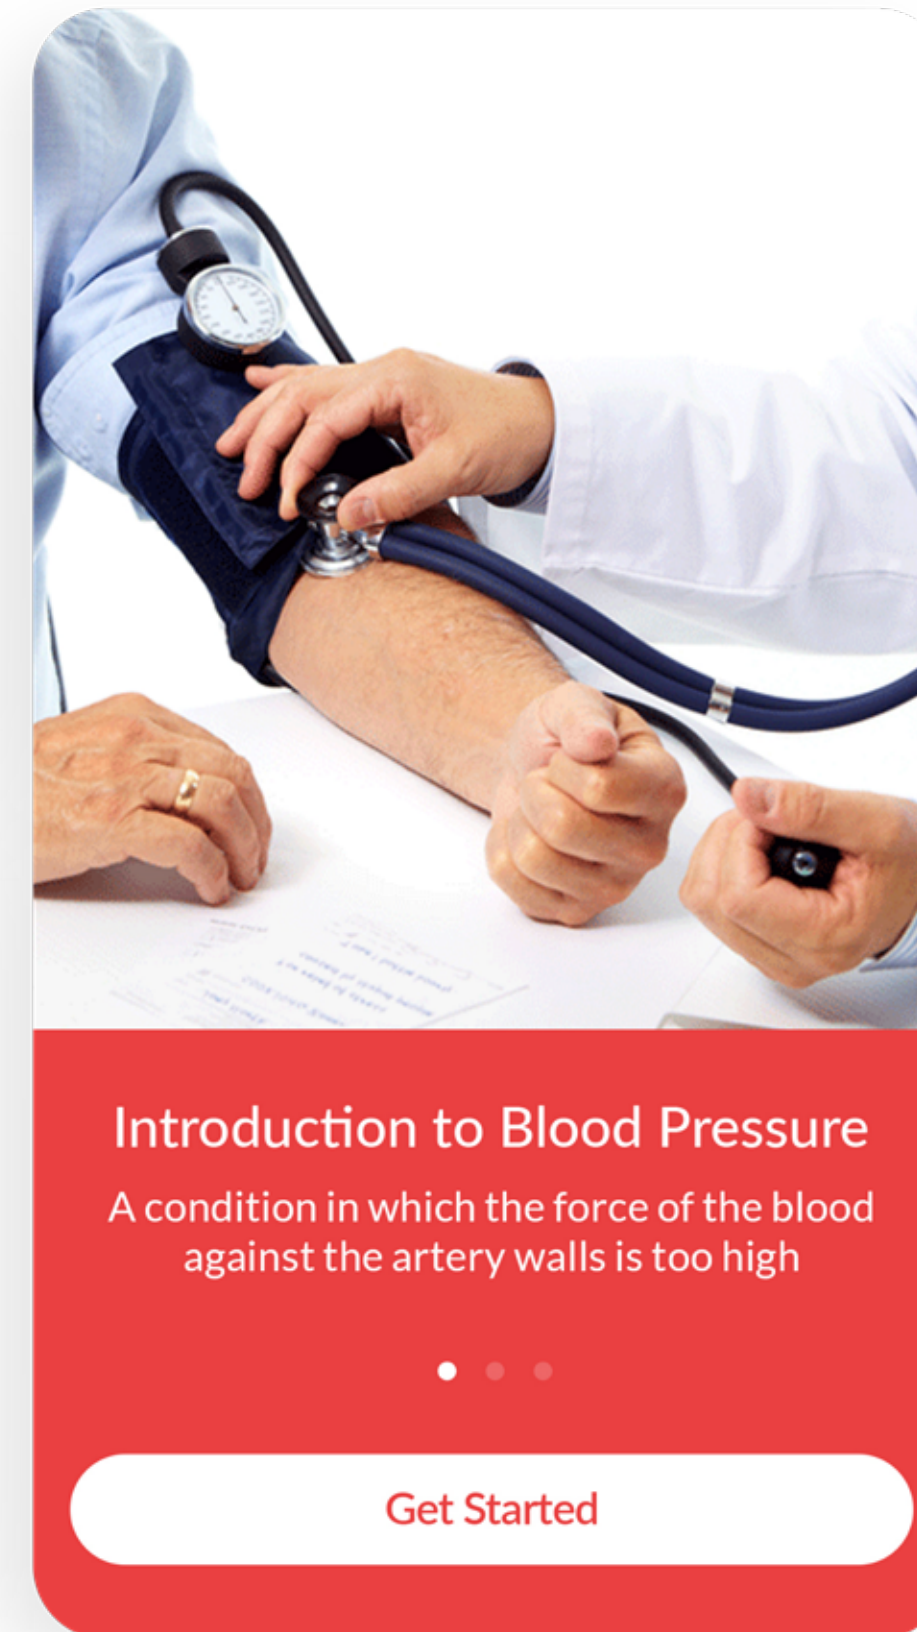

Problem Statement

Provide patients with right information based on their blood pressure and help them overcome any major health issues beforehand.

Solution Provided

We created a mobile-based platform where patients can register and add their basic details like age, weight, machine they are using to monitor their BP and more, based on that and the blood pressure data that they feed in our app provides them preliminary level health inputs.

Platforms -  

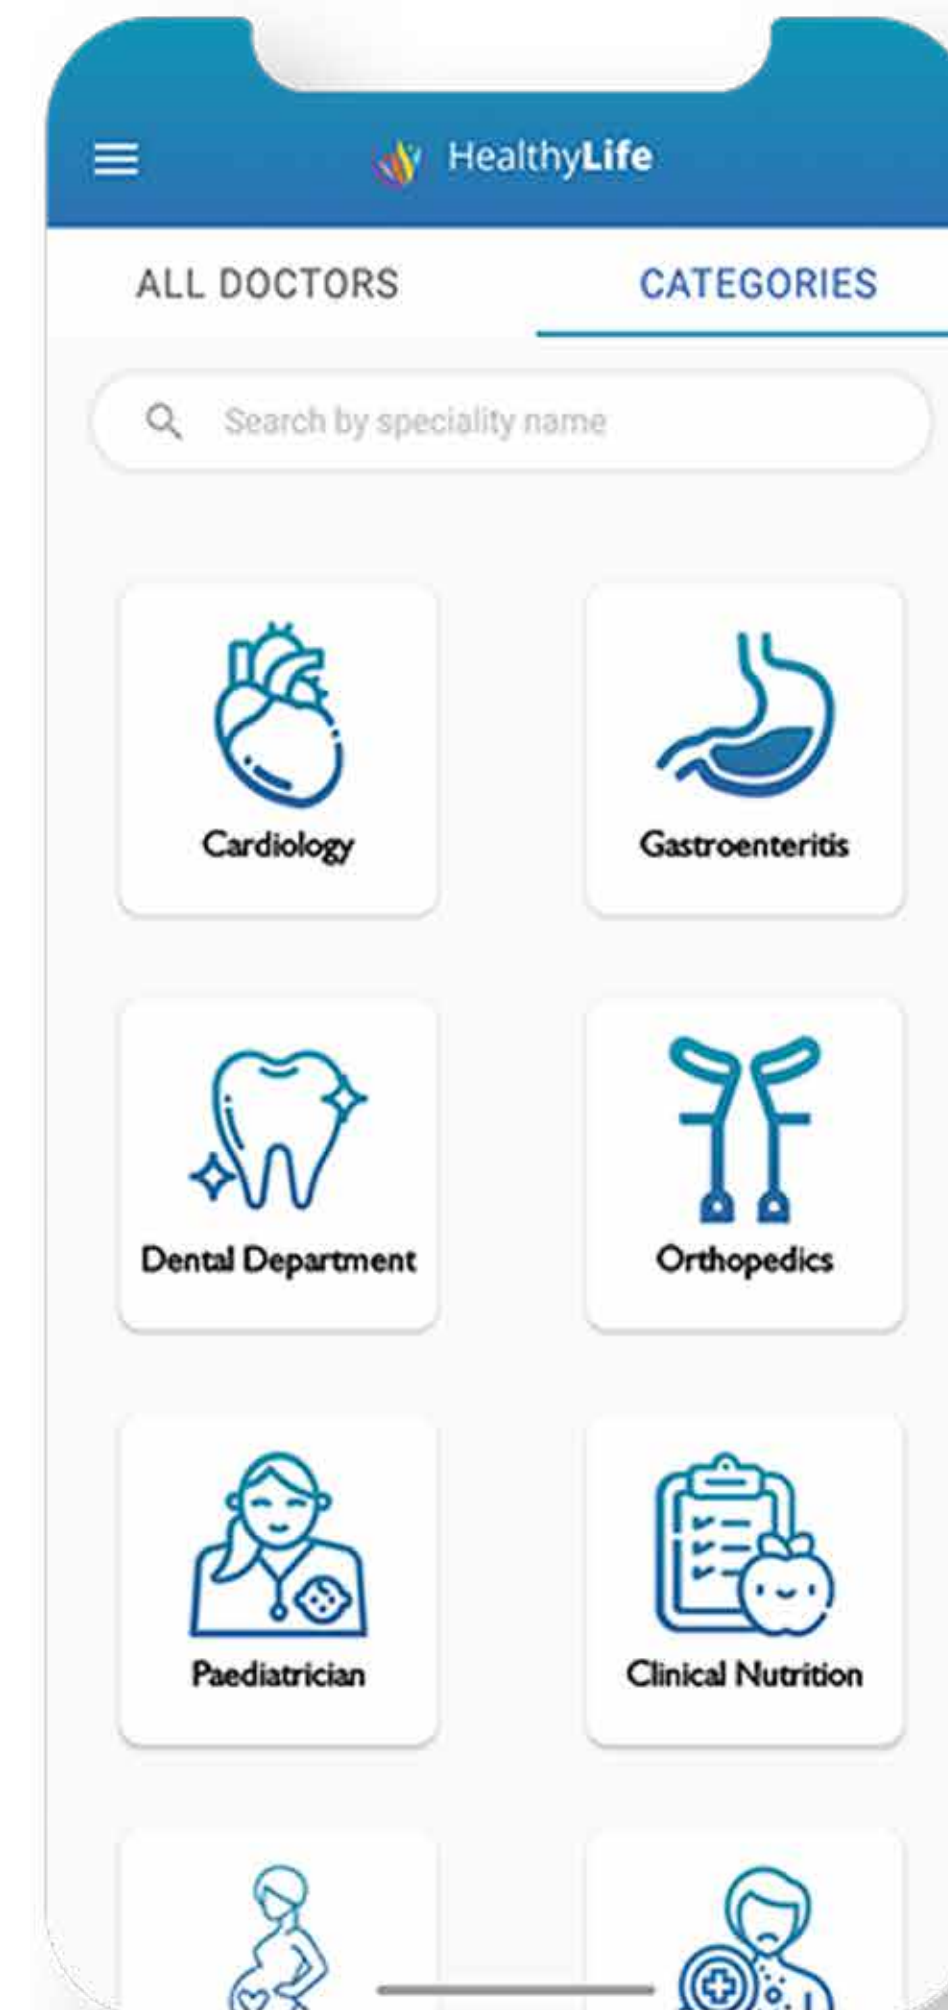

Online Consultation Application

With COVID-19 hitting the world, the need for every business to go digital was inevitable. Healthcare has been early adopters of technology and are still dominating that race.

Benefits of Online Consultation App

- ✓ Easy access to healthcare globally
- ✓ Video consultation with your preferred doctors
- ✓ One-on-one chat
- ✓ Online prescription and health reports record for easy access
- ✓ Audio consultation with doctors
- ✓ Appointment scheduler and reminders
- ✓ Online payments

Platforms -  

Patient Data Capture

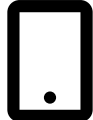

We have deployed around 50+ patient data capture applications for many of our clients over a decade of time.

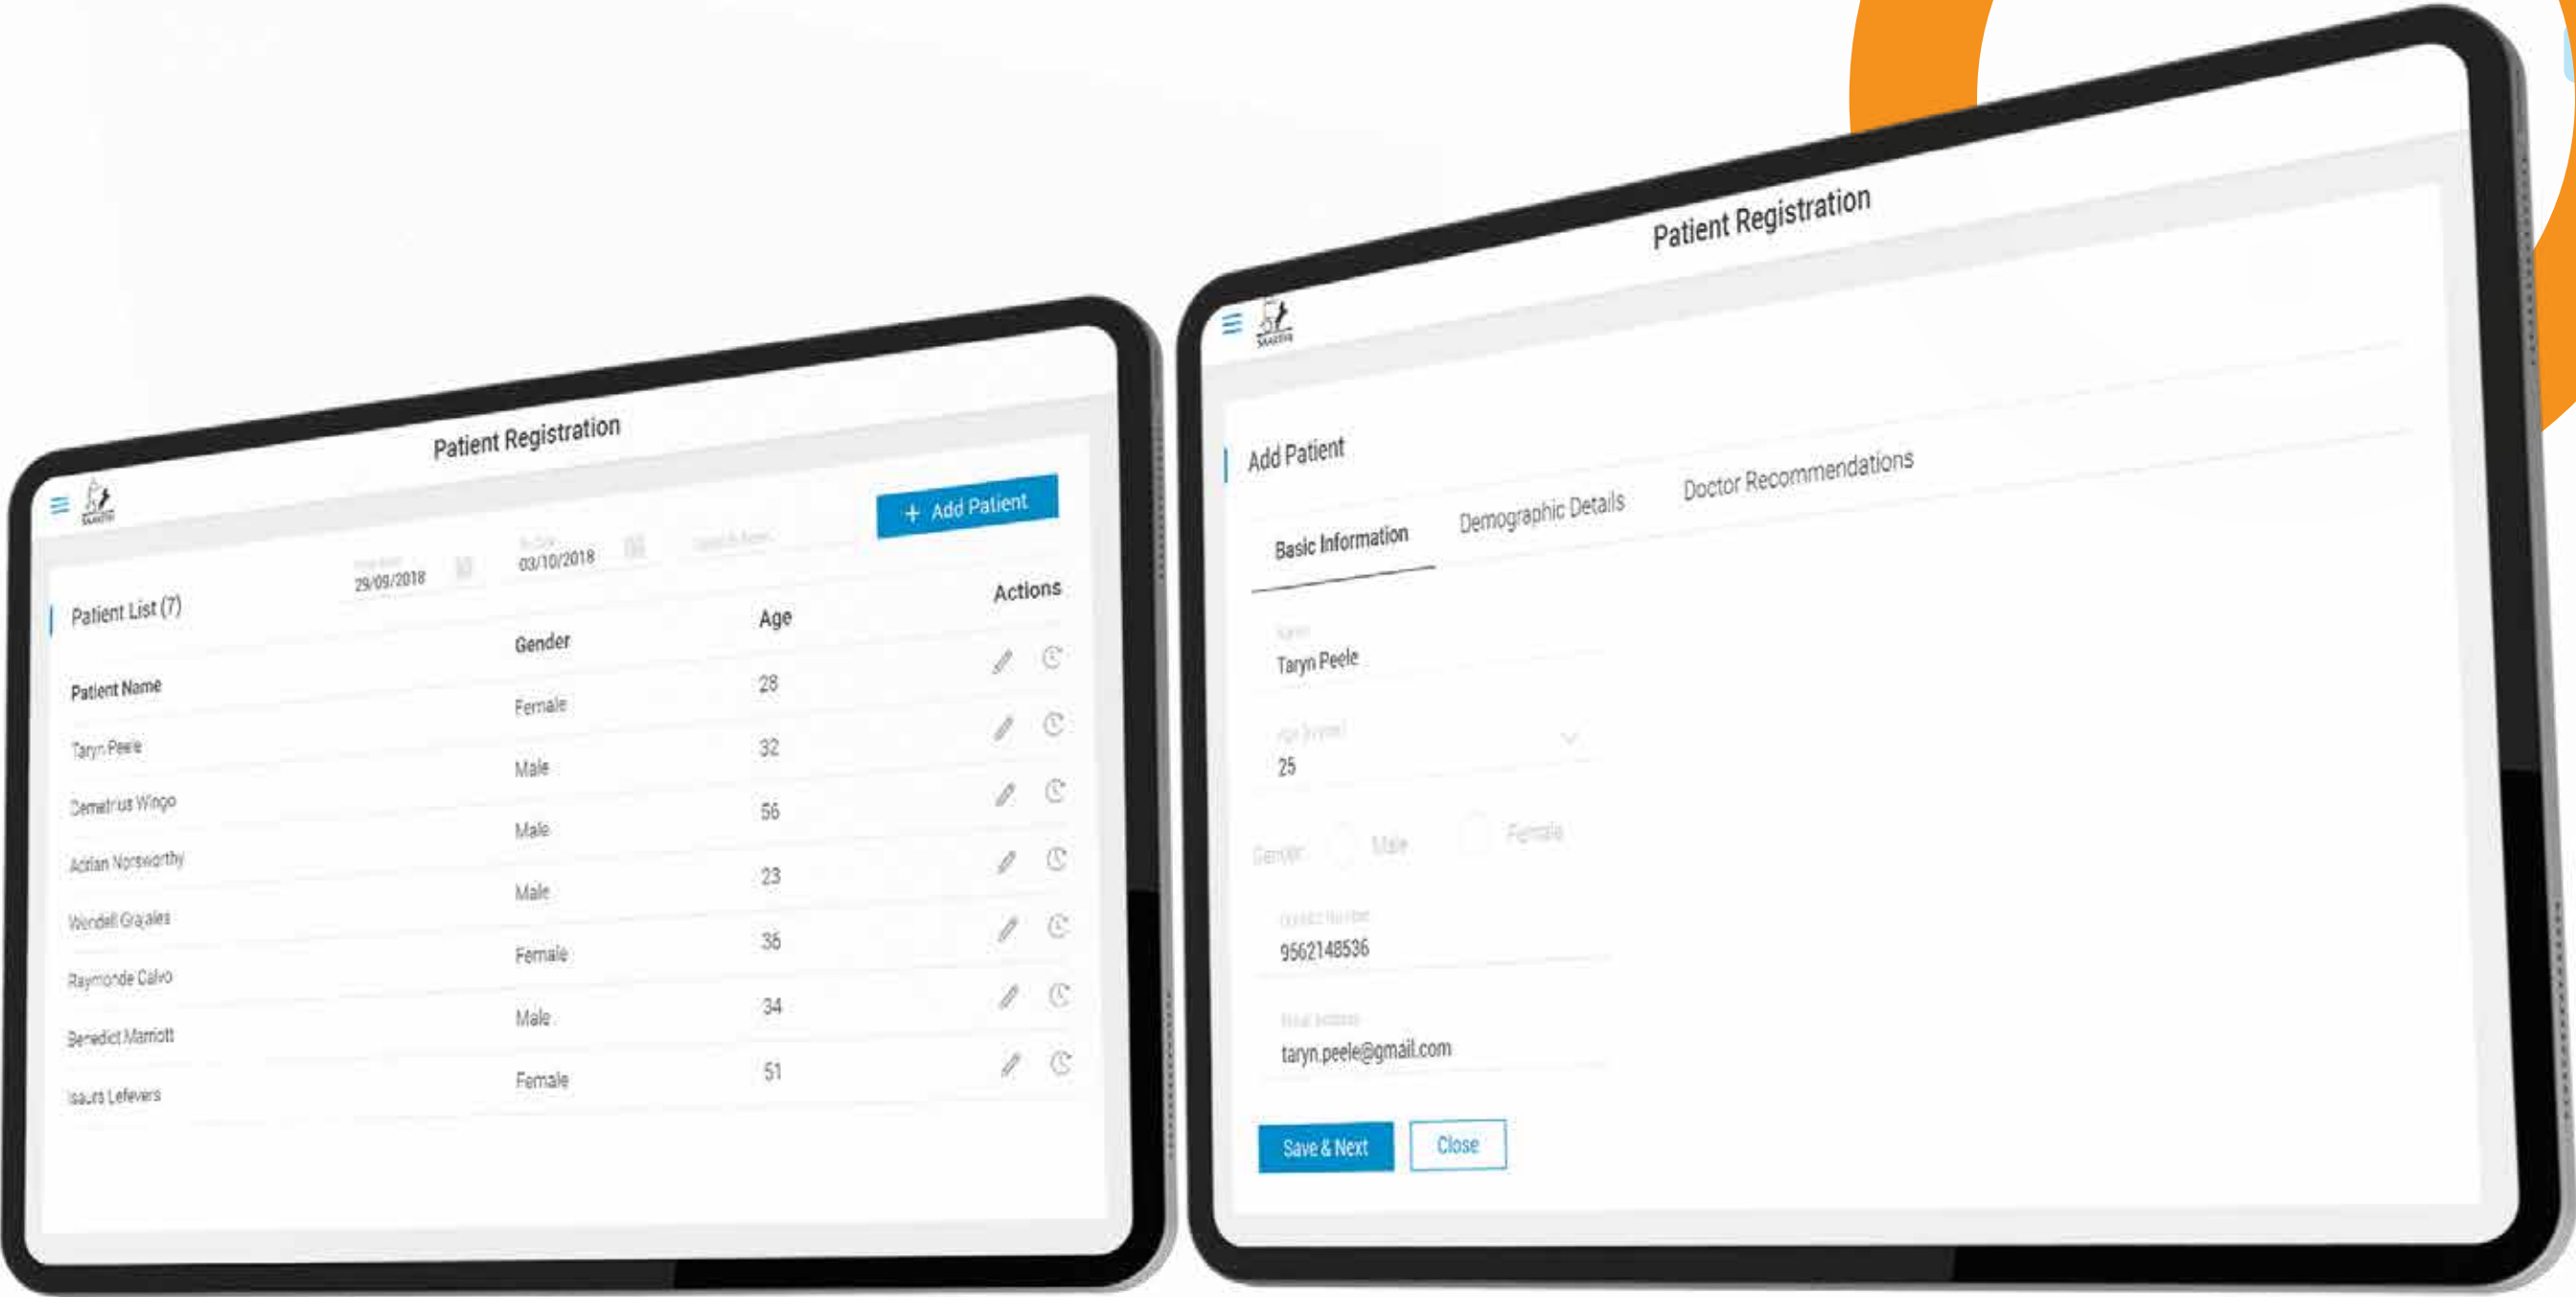

Problem Statement

To have a consolidated space where patients information can be managed and tracked by health care organisations.

Solution Provided

We provided a robust web based system which will allow the health-care professional to capture a patient's information and maintain the periodical history. The platform also provide appointment scheduling and tracking for easy reminders.

Platforms -
